

DEN BLÅ PLANET, NATIONAL AQUARIUM DENMARK

Experience a world under the seven seas. Get a close look at ferocious hammerhead sharks and elegant rays at Northern Europe's largest and most modern aquarium.

Den Blå Planet, National Aquarium Denmark is surrounded by water, giving visitors the sense of being beneath the surface of the ocean. The architecture is inspired by a whirlpool, and consists of five 'arms' that encircle the entire planet – from the bird colonies on the steep fells of the Faroe Islands to the stunning coral reefs of the world's oceans.

Enjoy a close encounter with hammerhead sharks and rays, as they swim towards you in the amazing underwater tunnel. Unleash your inner water baby in the Water Playground and give it all you have got with the pumps and locks. The physical activity and cooperation will give you a greater understanding of water.
