

# KROKODILLE ZOO

## The world's coolest animals

The crocodile lived on Earth already 200 million years ago side by side with the dinosaurs. It is perhaps the most successful survivor with the most incredible ability to adapt to extreme conditions ...Along with a park in Florida; *Krokodille Zoo* is the only place in the world where you can see all the existing species of crocodilians.

You can experience crocodiles of all sizes including Europe's largest crocodile *Sobek* and a variety of snakes, monkeys and giant turtles, and as the only place in Denmark, you can also see Clouded leopards!

The most important thing for us is that you enjoy your visit at *Krokodille Zoo* and get an exciting experience that hopefully gives an understanding of how amazing crocodiles are and how important their place in the world is.
