

# NORDISK FILM

Nordisk Film is the film studio in which most interior scenes of the Olsen Gang films of 1968 to 1998 were filmed. The exhibition replaces the previous and will be four times bigger. The new exhibition consists of new and nevertheless so well-known scenes from the films - e.g. the bunker from Jutland, the cozy living room of Yvonne and the swanky office of the director Hallandsen. There are also more than 150 original items in the exhibition such as props and costumes from the 14 original films - some of which have never been previously shown! As a visitor, you also get a unique insight into the origins of some of the most iconic and memorable scenes of the Olsen Gang by never before seen "making-of" pictures. The tour includes exciting stories and funny anecdotes from the last 50 years with the Olsen Gang - told by the local and professional guides.
